

# HUBSPOT OMNICHANNEL COMMUNICATION ONBOARDING GUIDE

## Powered by Mitto

Add SMS, WhatsApp, and Viber messaging to HubSpot with Mitto's tailored SMS and chat app integrations.

### Before you start, make sure you:

1. Have a Mitto account and API key
2. Have a HubSpot Professional or Enterprise account
3. Know which channels you want to use: SMS, WhatsApp, Viber

**⚠ Note:** WhatsApp requires template approval and a verified business phone number.

#### ☐ STEP 1: DISCOVERY & CHANNEL SETUP

- Choose which channel(s) to enable: [SMS](#), [WhatsApp](#), or [Viber](#)
- Get expert advice on campaign use cases, audience targeting, and workflows
- Discuss template needs and use cases

#### ☐ STEP 3: TEMPLATE APPROVAL

- Submit pre-approved message templates
- Templates approved via Mitto's API
- Meta approval time: ~2 hours
- Use rich media, buttons, and variables to enhance engagement

#### ☐ STEP 2: INTEGRATION SETUP

- Install [Mitto Global SMS](#) or [Mitto for WhatsApp and Viber](#) from the HubSpot Marketplace
- Add your Mitto API Key to connect your account or try sending SMS for free with Mitto's self-service [signup](#).
- Our team supports you in configuring sender IDs and channel settings

#### ☐ STEP 4: TESTING & LAUNCH

- Send test messages
- Ensure workflows and triggers are firing properly
- Start sending live messages to your contacts
- Track message activity in the contact timeline to monitor delivery, content, and responses.

#### ☐ YOU'RE LIVE

Once completed:

- ✓ Integration is active
- ✓ Templates are approved
- ✓ Workflows are configured and on

You're ready to meet your customers where they are—with messages that matter, exactly when they need them.

#### MAIN CAPABILITIES AFTER SET UP

- Add messaging directly into HubSpot workflows using native action blocks
- Run one-way bulk campaigns or engage in two-way conversations
- Personalize messages with HubSpot fields and dynamic content
